EMD passwords

dd+mm+yy=

10+19+04= 15
add each numerator 1+0+1+9+0+4
key number is 5

yyyy
2004
key number is 4

reverse dd
19
91
key numbers are both numbers

today's password 10-19-04 would be 5491

Password changes every day to coincide with actual date.
It should be noted that the computer date must match actual date
